

Over the last few months the Business Advisors from the Internet Growth Alliance and Enterprise Ireland have been working on developing and creating a comprehensive programme of learning aimed towards Irish internet businesses that wish to scale.

Today sees the launch of the Internet Growth Acceleration Programme. It is comprehensive, intensive and it will provide Irish internet entrepreneurs with access to a host of learning and networking opportunities - both local and worldwide. Download a pdf on the programme [here](#) . The programme will run from November 2009 to April 2010 and EI are now accepting applications - see www.enterprise-ireland.com/igap for details and the application process.

Sincere thanks to the people in EI for working on this project and in particular a big "thank you" to all the business advisors who gave up their time to support and input to the creation of this programme - I have no doubt that this programme will help many Irish Internet businesses as they devise and implement their international growth strategies. See [Press Release here](#) . Please spread the word about this programme! Colm.
